MOUNTAIN VIEW / LOS ALTOS
CALIFORNIA

ABOUT US

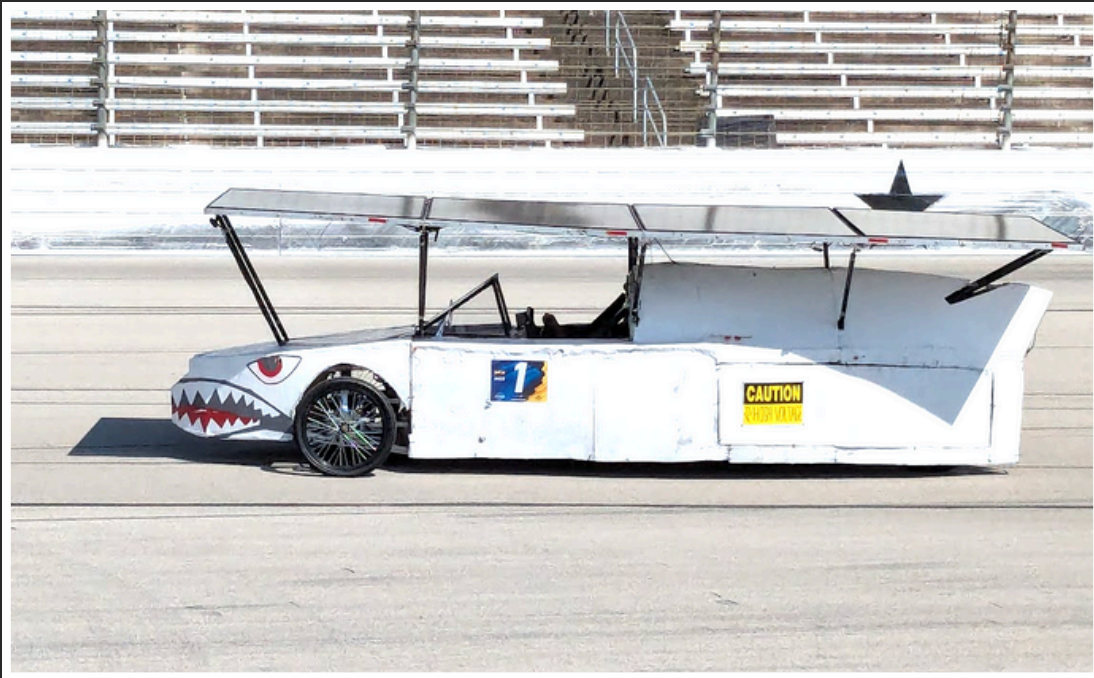

Garage 803 Racing is a high school solar car racing team and 501(c)(3) Non-Profit Organization that competes in the Solar Car Challenge, an international high school solar car competition. We are based in Mountain View / Los Altos, California.

We are dedicated to designing, constructing, and competing with solar-powered vehicles while motivating hands-on STEM education and sustainability. We are a group of passionate students that collaborate to develop engineering solutions and gain real-world problem solving skills.

We will design and build a one-seater solar car that's fully dependent on solar energy. This car will be designed to race on the road across Texas. Throughout this 2026 season, we will research, design, and manufacture a race-capable solar car for the event.

WHAT IS THE SOLAR CAR CHALLENGE

The Solar Car Challenge is an international competition that invites high school students to design, build, and compete with fully solar-powered vehicles. Students apply real-world engineering and problem-solving techniques as they construct their vehicles, testing efficiency, speed, and endurance in a competitive environment. The Solar Car Challenge is greater than a competition, for it fosters leadership, sustainability, and a passion for cutting-edge technology, defining the future of engineers and innovators.

SOLAR CAR CHALLENGE 2025

WHY WE NEED YOUR HELP

We need YOUR help to support us financially as we build and race our car. Our project requires funding for materials, tools, travel, and competition fees. Your sponsorship will enable us to bring this project to life, allowing students to gain hands-on STEM experience while advancing sustainable technology and awareness.

OTHER WAYS TO SUPPORT US

If you are unable to donate money and support us financially, you can still support us through other means! Your company can provide us with the necessary materials or resources we need (e.g. panels, metal, tools, etc). Another option is to sponsor us with your company's services (e.g. manufacturing services, software, etc). Contributions of materials and services are weighted in the same manner as cash donations and will receive the appropriate benefit tier based on the cost.

BREAKDOWN OF NEEDS

Materials for car

e.g. motor, solar array, frame, suspension, battery, etc

Travel Costs

e.g. hotel, gas, trailers, meals, etc

Competition Fees

Various fees to register for event

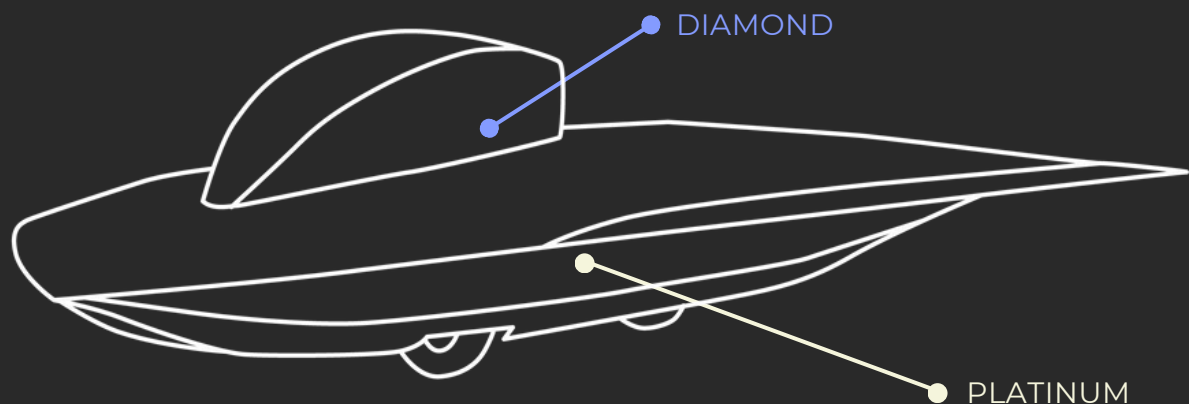

GARAGE 803 RACING IS A 501C(3) NONPROFIT ORGANIZATION, ALL SPONSORSHIPS AND DONATIONS ARE TAX DEDUCTIBLE.
